

California OES Weather Threat Briefing

Wednesday, May 26, 2021
9:00 AM PDT

Day 1 (Wednesday): Gusty winds and ongoing very dry weather across the southern California mountains and deserts will contribute to another day of elevated fire weather conditions

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

05/26/21 - 06/01/21

Wednesday - Tuesday)

- Dry weather continues for the majority of the state through the weekend and early next week, with the exception of a few possible showers across far northwest California Thursday and a few isolated daily thunderstorms over the Sierras Friday through Sunday
 - Any rainfall with these showers will be very light
- Elevated fire weather concerns will continue over the deserts and mountains of southern California through the weekend, with locally gusty winds of 35-50 mph expected in those areas each day
- A notable warming trend is expected by late in the weekend and especially next week, with some heat impacts likely to develop over much of southern California and the Central Valley
